RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 54 pages. Original publisher: Reston, Va. : U. S. Dept. of the Interior, U. S. Geological Survey, 2006. OCLC Number: (OCoLC)74182338 Subject: Groundwater -- Cape Verde. Excerpt: . . . Methods 5 Water-Quality Data Electric-Tape Measurements Manual water-level measurements in p roduction and Field p arameters were measured and laboratory analysis observation wells were made by the INGRH and the U SGS of environmental tracers was conducted on water samp les with calibrated electric tap es in all three p roject basins. The collected from sp rings, wells, streams, and tunnels in the three accuracy of this method is about 0. 0 1 m, which is of sufficient study basins. This information is used for evaluating sources p recision to p rovide a baseline for monitoring both seasonal of recharge, ground-water residence times, ground-water flow and longer-term water-level changes. Three lengths of electric p aths, and salt-water intrusion. It will also p rovide a baseline water-level tap es ( 6 0-, 1 0 0-and 2 5 0-m ) were used, dep ending geochemical data set for p otential evaluation of future changes on the dep th to water at each well. Water-level measurements to the ground-water systems. were corrected by subtracting the distance from the measur-ing p oint above land surface. Land-surface altitudes were Field Parameters estimated with hand-held GPS, top ograp hic map s, or from drillers logs. Although the accuracy of these altitudes is only Field water-q uality p arameters were measured at ground-about p lus or minus 1 0 m, this study was concerned with rela-water and surface-water sites according to U SGS p rocedures tive dep th below land surface and temp oral changes in ground-( Wilde and Radtke, 1 9 9 8 )....
