Dept. of Agriculture, Forest Service, Pacific Northwest Research Service, 2002 OCLC Number: (OCoLC)51526577 Subject: Environmental responsibility. Excerpt: . . . How do we generalize from the subject watershed to other watersheds, and to the region How do tradeoffs (including risks) change as the proportion of the watershed under management changes How do we develop robust management regimes for the entire watershed What are the institutional challenges to evaluating compatibility at the province scale Spatial pattern and landscape context: How do we develop models that relate pattern of forest habitat at landscape scale to quality of habitat and population performance for most species Landscape-and regional-scale variation in habitat relations: How do habitat relations vary across environmental gradients Habitat: How does aquatic and wildlife habitat quality vary in relation to forest structure and composition, and to watershed features (scale: local stand watershed to midscale province) Variation in forest dynamics across landscapes: How do we model the structure, composition, and changes in forest vegetation across environmental gradients, including from riparian to upland areas How do we model the diversity of forest management practices by different owners across the landscape How do we develop the linkages between terrestrial and aquatic ecosystems Understanding and modeling the linkage among upslope, riparian, and aquatic ecosystems are among the most critical problems of the forest compatibility issue in the Northwest. Spatial modeling and accuracy: How do we evaluate and minimize the spatial errors in geographic information system (GIS) models, especially regarding map-based models of forest conditions across landscapes Scaling and aggregation problems: How much fine-grained information do we need to project the effects and outputs of forest management at landscape...
