RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 230 pages. Original publisher: Washington, D. C. : National Aeronautics and Space Administration, Office of Management, Scientific and Technical Information Division ; Springfield, Va. : For sale by the National Technical Information Service, 1990. OCLC Number: (OCoLC)61102747 Excerpt: . . . I. INTRODUCTION Low altitude microburst windshear represents a significant hazard to aircraft, particularly during take-off and landing; the intense down drafts and the resultant divergent outflow, can have a significant effect on the lift characteristics of the endangered aircraft. When encountered at low altitude, the pilot has little time to react correctly to maintain safe flight. The Federal Aviation Administration (FAA), jointly with the National Aeronautics and Space Administration (NASA), has sponsored an investigation into the development of airborne sensors to detect microburst windshear. One sensor of interest is a microwave Doppler radar operating at X-band or higher frequencies. Critical to the analysis of the capability of such a sensor to perform this detection is the microwave backscatter description of both the microburst event and the clutter background, especially during the approach and departure from an airport. The Environmental Research Institute of Michigan...

Reviews

Undoubtedly, this is the best function by any writer. It usually will not charge too much. I am just very easily can get a pleasure of looking at a written ebook.
